The Wireless Health Institute at UCLA is currently recruiting participants for our 2017 Summer Undergraduate Scholars Program.

Advances in engineering and computer science are enabling the design of powerful home and mobile technologies that can augment functional independence and daily activities of people with physical impairments, disabilities, chronic diseases and the accumulative impairments associated with aging. The Wireless Health Institute at UCLA is a collaboration between UCLA Schools of Medicine, Nursing, Engineering and Applied Sciences, Business, the Clinical Translational Science Institute for medical research, and the Ronald Reagan UCLA Medical Center aimed at developing new technology essential to the next generation of health care.

Research focus:
1) Acoustic Environment Classification
2) Internet of Things for Wireless Health
3) Reliable Inference of Upper Limb Activities
4) Data Collection and Predictive Analytics
5) Energy-aware Inferencing of Rich Contexts & Behaviors
